

# Sign Up for Research Opportunities in Kidney Disease !

The division of Nephrology at the University of Michigan is dedicated to serving people with kidney disease. We are working hard to improve patient care through research.

Through research, doctors and patients can:

- ⊕ Learn new information about kidney health and disease
- ⊕ Develop and learn about new ideas for therapy
- ⊕ Increase social contact and support systems
- ⊕ Gain the satisfaction of knowing they may be contributing to the health of others like themselves

To learn more, contact Alan Vollmer
